

Otar Davitashvili

I create visually refined, functionally robust digital products where complex information translates into simple, intuitive interfaces or a cohesive visual language. Driven by business vision and needs, my workflow relies on defining the product lifecycle correctly, maintaining consistent visual architecture, applying best user practices, and actively participating in bringing the final product to its end user.

// Career Roadmap

UI/UX Consultant

- The World Bank's GRAIL Project — Feb 2024 — Present FULL-TIME
National Agency of Public Registry
- Designed the National Spatial Data Infrastructure portal (nsdi.gov.ge) and GovTech remote registration platforms (Smart Contracts).
 - Led the comprehensive UI/UX overhaul for the Agency's main public portal (napr.gov.ge), currently in active development.
 - Spearheading the creation of the unified Design System using design tokens, primitive variables, and structured UI components in close coordination with engineering teams.
